## MOTTO AND DEDICATION

*“The best way of learning is teaching,  
Learning has no age limit because learning is a lifelong process”*

(Telji Yolven Palembang, 2024)

### DEDICATION:

I proudly dedicate this thesis especially for:

My beloved Parents, my three cherished children, and my entire dear family, who  
have always supported and motivated me, giving me strength to face each day

## ACKNOWLEDGMENT

All praise and thanks be to God the Father, the Almighty and Loving Creator of the heavens and the earth and all that is in them. By His grace, this thesis, entitled 'The Influence of Coaching and Mentoring on the Growth of EFL Among Young Learners,' has been completed.

Therefore, the author expresses gratitude to all those who have assisted in the writing process of this thesis. May God reward all your help and bless you all. The author acknowledges that this thesis is still not perfect in its composition and content. The author hopes that feedback and suggestions from readers will aid in improving future theses. In conclusion, it is hoped that this thesis will provide readers with greater insight into coaching and mentoring. Thus, the author would like to extend special appreciation to everyone involved:

1. Dr. Rustamadji, M.Si., as the Rector of Education university of Muhammadiyah Sorong
2. Roni Andri Pramita, M.Pd. as the Dean of Faculty of Language, Social and Sport Education.
3. Nurteteng, M.Pd. as the Head of English Department And as the advisor, who has provided exemplary guidance and support, offering invaluable feedback and assistance that has been profoundly meaningful and valuable. I extend my heartfelt thanks and wish Nurteteng, M.Pd. always in good condition and abundant blessings
4. Dr. Nursalim M.Pd. as the 1<sup>st</sup> examiner

5. Rizqi Caludia Wardani H, M.Pd. as the 2<sup>nd</sup> Examiner
6. All lectures in English Education Department for valuable knowledge
7. All of the staff in English Education Department
8. Deepest thanks to my Parents for providing motivation and support that surpasses anything else in this world. To my siblings, both brother and sister, for your support and sincerity. And thanks to my children for the inspiration that keeps me moving forward.
9. Thanks to the Principal of Inpres 62 Primary School for supporting the implementation of English language instruction at the school.

Sorong, The 1<sup>st</sup> of August 2024

## ABSTRACT

**Telji Yolven Palembang/ RPL12385209004, 2024. *The Influence Of Coaching And Mentoring On The Growth Of Efl Among Young Learners*. Thesis, English Education Department, Faculty of Education, Language, Social and Sport, Education University of Muhammadiyah Sorong. August 2024.**

This study explores the influence of coaching and mentoring on the growth of English as a Foreign Language (EFL) among young learners at Inpres 62 Primary School in Sorong Regency, focusing on fifth-grade students, a total of 34 learners. A sample of 12 students was randomly selected from this group, comprising both Papuan and Non-Papuan students. Utilizing a quasi-experimental design, the study divided these 12 students into two groups, with 6 Papuan and 6 Non-Papuan students receiving identical coaching and mentoring interventions. Assessments were conducted through pre-tests and post-tests evaluating reading, writing, and listening skills. Results indicated substantial improvements in both groups. The paired sample t-test confirmed significant enhancements in language skills, with a p-value of 0.000 demonstrating robust statistical significance. This improvement was attributed to the program's emphasis on individualized support, goal-setting, and interactive activities, which effectively increased learners' confidence and motivation. Feedback from both learners and educators highlighted the positive impact of the program. Recommendations include differentiating instruction, providing individualized feedback, creating supportive learning environments, and pursuing continuous professional development for teachers. For students, proactive engagement and regular practice are encouraged, while future research should explore diverse contexts and the long-term effects of coaching and mentoring.

**Keyword: Influence, Coaching, Mentoring, Growth of EFL Young Learners**

# **CHAPTER I**

## **INTRODUCTION**

### **1.1 The Background of the Research**

The acquisition of English as a Foreign Language (EFL) has become a pivotal component of educational curricula worldwide, reflecting the language's global significance in communication, commerce, and culture. For young learners, effective methods of language acquisition are critical in building a strong foundation for future proficiency. Coaching and mentoring have emerged as influential approaches in this context, offering personalized and supportive learning environments that can enhance language acquisition.

In an increasingly globalized world, proficiency in English as a foreign language has become a crucial skill for young learners. The ability to communicate effectively in English opens doors to vast educational and professional opportunities, fostering cross-cultural understanding and collaboration. English proficiency is essential for participating in the global economy and accessing higher education (Harmer, 2007).

Despite the clear benefits of EFL proficiency, many young learners struggle with language acquisition due to various factors, such as lack of motivation, inadequate support, and insufficient exposure to authentic language use. Traditional classroom instruction often fails to address these challenges comprehensively, leading to suboptimal learning outcomes. This problem underscores the need for

innovative and personalized approaches to EFL education that can better engage young learners and support their linguistic development.

This study focuses on the influence of coaching and mentoring on the growth of English as a foreign language among young learners. Coaching and mentoring are personalized and dynamic educational approaches that provide learners with tailored support, feedback, and encouragement. These methods have gained prominence in language education due to their potential to enhance motivation, confidence, and overall language competence (Richards & Rodgers, 2014).

Studies published in the *International Journal of Mentoring and Coaching in Education* and works by authors such as Daloz (2012) and Garvey, Stokes, and Megginson (2018) highlight the effectiveness of mentoring and coaching in educational settings. These studies provide a foundation for exploring how these approaches can be applied specifically to young learners acquiring English as a foreign language.

The Importance of Early EFL Acquisition, the critical period hypothesis, proposed by Lenneberg (1967), suggests that there is an optimal window for language acquisition, particularly for children. During this period, young learners are more adept at acquiring language skills with greater ease and fluency. Modern education systems have increasingly integrated EFL programs at early stages to capitalize on this window of heightened linguistic receptivity.

Coaching in the context of EFL involves a structured, goal-oriented approach to language learning, where coaches provide targeted instruction and

feedback to learners. According to Passmore and Fillery-Travis (2011), coaching is characterized by its collaborative nature, wherein the coach and learner work together to identify goals, develop strategies, and monitor progress. In the realm of EFL, coaching can help young learners by providing tailored linguistic support, thus fostering greater engagement and retention of the language

Mentoring in ELF, distinct from coaching, involves a more holistic approach to personal and academic development. Mentors serve as role models and guides, offering not only linguistic support but also cultural insights and motivational encouragement. According to Ehrich et al. (2004), mentoring relationships can significantly enhance the educational experiences of young learners by providing a nurturing environment that promotes confidence and resilience. In EFL contexts, mentors can help bridge cultural gaps and provide authentic language exposure

The application of Vygotsky's (1978) Sociocultural Theory to EFL highlights the importance of social interaction in language development. Vygotsky emphasized the role of more knowledgeable others (MKOs) in facilitating learning through scaffolding. Both coaching and mentoring align with this theory, as they involve knowledgeable individuals guiding learners through the complexities of language acquisition.

Similarly, Krashen's (1982) Input Hypothesis underscores the need for comprehensible input in language learning. Coaches and mentors can provide this input through carefully designed activities and interactions that align with the learner's current proficiency level, thus promoting incremental language growth.

Recent empirical studies have highlighted the positive impact of coaching and mentoring on EFL acquisition. For instance, a study by Hurd and Lewis (2008) demonstrated that personalized coaching led to significant improvements in learners' language skills, particularly in areas such as pronunciation, vocabulary, and conversational fluency. Another study by Mullen and Noe (2013) found that mentoring relationships contributed to increased motivation and persistence among young EFL learners.

Furthermore, research by Wang and Han (2011) indicated that coaching and mentoring interventions resulted in higher levels of learner autonomy and self-efficacy, essential components for long-term language acquisition success. These findings underscore the importance of incorporating coaching and mentoring into EFL programs to enhance language outcomes for young learners.

The integration of coaching and mentoring into EFL education for young learners offers promising avenues for enhancing language acquisition. By providing personalized, supportive, and interactive learning environments, coaches and mentors can significantly influence the growth of EFL skills among young learners. The subsequent chapters will delve deeper into the methodologies, implementation strategies, and empirical outcomes associated with these approaches, providing a comprehensive understanding of their impact on EFL education.

## **1.2 Formulation of the Research Problem**

To explore this problem, the study will focus on the following research questions:

1. Does coaching and mentoring program influence the English language proficiency of young learners?
2. What specific aspects of the coaching and mentoring program contribute to improvements in English language proficiency among young learners?

## **1.3 Objective of the Research**

The objectives of this research are as follows:

1. To determine whether or not a coaching and mentoring program influences the English language proficiency of young learners.
2. To identify the specific aspects of the coaching and mentoring program that contribute to improvements in English language proficiency among young learners, such as:
  - Frequency and duration of coaching sessions
  - Individualized feedback and support
  - Use of interactive and engaging teaching materials
  - Development of learner-specific goals and progress tracking
  - Encouragement and motivation strategies
  - Integration of real-life communication practice

By addressing these objectives, the research aims to provide a comprehensive understanding of how coaching and mentoring programs can be effectively designed to enhance the English language proficiency of young learners.

#### **1.4 Main Hypothesis**

1. H<sub>0</sub>: Coaching and mentoring do not have a significant effect on improving young learners' English language proficiency.
2. H<sub>1</sub>: Coaching and mentoring have a significant effect on improving young learners' English language proficiency.

#### **1.5 Significance of the Research**

Understanding the influence of coaching and mentoring on young EFL learners can provide valuable insights for improving language education strategies. By identifying effective practices and highlighting the benefits of personalized support, this research can contribute to the development of more effective EFL programs that cater to the needs of young learners. Ultimately, this can lead to higher levels of English proficiency, better educational outcomes, and greater opportunities for young individuals in a globalized world.

##### **1.5.1 Significance for Teachers**

Teachers can gain new strategies and methodologies for incorporating coaching and mentoring into their classrooms. Understanding the specific techniques that enhance language acquisition can help teachers provide more personalized and effective instruction, thereby improving student outcomes.

### **1.5.2 Significance for Students**

Young learners benefit directly from improved EFL programs that incorporate coaching and mentoring. Personalized support can boost their confidence, motivation, and engagement, leading to better language proficiency and academic performance. This, in turn, can open up more educational and professional opportunities in the future.

### **1.5.3 Significance for Schools**

Schools can use the research findings to design and implement more effective EFL programs. By integrating coaching and mentoring into their curricula, schools can enhance the overall quality of language education, leading to improved student outcomes and satisfaction.

## **CHAPTER II**

### **LITERATURE REVIEW**

This chapter reviews existing literature on the influence of coaching and mentoring on the growth of English as a foreign language among young learners. The review is organized into several sections, each focusing on key aspects of coaching and mentoring, their impact on language acquisition, and relevant theoretical frameworks.

#### **2.1 Coaching in Language Education**

Coaching in language education involves a structured process where an experienced educator provides individualized guidance to students, focusing on specific language skills and goals. According to Richards and Rodgers (2014), coaching helps in addressing the unique needs of each learner, thereby improving their language proficiency. Research published in the *Journal of Language Teaching and Research* highlights that coaching can significantly enhance learners' speaking, listening, and writing skills by providing targeted feedback and personalized strategies (Li & Zhang, 2016).

The purpose of coaching is multifaceted and varies across different contexts and applications. This chapter explores the perspectives of various experts on the purpose of coaching, providing a comprehensive understanding of its goals and benefits.

### **2.1.2 The Definitions of Coaching According to Experts**

According to David Clutterbuck (2003), a prominent author on coaching and mentoring, emphasized the role of coaching in helping individuals and organizations achieve their goals through structured conversations. Clutterbuck pointed out that coaching aims to provide clarity and support for goal achievement: "The purpose of coaching is to help people see their situation more clearly, identify what they want to achieve, and support them as they develop strategies to reach those goals."

According to Julie Starr (2008), in "The Coaching Manual," outlined the purpose of coaching as facilitating meaningful conversations that lead to clarity, progress, and goal achievement. Starr stressed the conversational nature of coaching: "The purpose of coaching is to engage in conversations that help individuals gain clarity, make progress, and achieve their goals."

According to Tony Stoltzfus (2009), in "Coaching Questions," emphasized the purpose of coaching as creating an environment that encourages individuals to reflect, set goals, and take action. Stoltzfus highlighted the power of questioning in coaching: "The purpose of coaching is to create a supportive environment through conversation and questioning that facilitates individuals' movement toward their desired goals in a fulfilling manner."

According to Peter Hawkins (2011), in his book "Creating a Coaching Culture," described the purpose of coaching as achieving sustainable performance improvement through systemic change. Hawkins emphasized the importance of a holistic approach: "The purpose of coaching is to enable individuals and

organizations to achieve sustainable performance improvements by addressing both individual and systemic factors."

According to Christian van Nieuwerburgh (2012), in "An Introduction to Coaching Skills," highlighted the purpose of coaching as enhancing individuals' strengths and potential to improve their life experiences and performance: "The purpose of coaching is to facilitate conversations that enhance life experiences and performance by building on individuals' strengths and potential."

According to Erik de Haan (2020), in his comprehensive work on coaching, focused on the relational aspect of coaching, emphasizing its purpose in fostering self-awareness and development through dialogue: "The purpose of coaching is to create a relationship of ongoing collaboration where the coach helps the coachee learn through dialogue and reflection, fostering self-awareness and personal development."

The purpose of coaching, as articulated by various experts, revolves around enhancing performance, facilitating learning and development, and unlocking potential. These experts emphasize the importance of a supportive, collaborative, and reflective environment in achieving these goals. Despite differing emphases, the common thread across all definitions is the focus on helping individuals and organizations achieve their desired outcomes.

Understanding the purpose of coaching from the perspectives of leading experts provides valuable insights into its multifaceted nature. These expert views underscore the transformative potential of coaching in personal and professional contexts, highlighting its role in fostering growth, development, and achievement.

### **2.1.3 Definitions of ESL Coaching by Experts**

Coaching in the context of English as a Second Language (ESL) involves guiding and supporting learners to develop their language skills effectively. This chapter explores the definitions of coaching specific to ESL as provided by various experts, highlighting the principles and methods that make coaching a valuable tool in language acquisition.

Jim Cummins (2000), known for his work on bilingual education, highlighted the importance of developing both Basic Interpersonal Communicative Skills (BICS) and Cognitive Academic Language Proficiency (CALP). Cummins suggested that coaching should address both everyday conversational skills and academic language: "Effective ESL coaching addresses both conversational fluency and academic language development, supporting learners in all contexts of language use."

David Nunan (2004), in "Task-Based Language Teaching," emphasized the role of real-world tasks in language learning. He proposed that coaching should involve task-based activities that mimic real-life language use: "Coaching for ESL should incorporate task-based activities that reflect real-world language use, enabling learners to practice and apply their skills in meaningful contexts."

Zoltán Dörnyei (2005), an expert in motivation in language learning, highlighted the importance of motivation and goal-setting in coaching. He suggested that effective coaching should focus on maintaining learners' motivation and setting achievable goals: "Coaching in ESL should emphasize motivation and goal-setting, helping learners stay engaged and make consistent progress."

According to Pauline Gibbons (2009), in her book "English Learners, Academic Literacy, and Thinking," emphasized the role of scaffolding in supporting language learners. Gibbons suggested that coaching should involve providing appropriate scaffolding to help learners gradually achieve higher levels of proficiency: "ESL coaching should involve scaffolding techniques that support learners at their current level and help them gradually achieve higher proficiency."

Anne Burns (2010), an expert in action research in language teaching, highlighted the importance of reflective practice in coaching. She suggested that coaching should encourage learners to reflect on their learning processes and outcomes: "Effective ESL coaching should encourage reflective practice, helping learners to think critically about their language learning experiences and outcomes."

The definitions of ESL coaching provided by various experts emphasize different aspects of the learning process, including comprehensible input, interaction, feedback, motivation, real-world tasks, and reflective practice. These definitions collectively underscore the importance of creating a supportive and interactive learning environment that addresses both conversational and academic language skills.

Understanding the definitions of ESL coaching from the perspectives of leading experts helps to frame the practice within a comprehensive context. These definitions highlight the multifaceted nature of coaching in language acquisition, emphasizing the need for tailored approaches that support learners' diverse needs and goals. As the field of ESL coaching continues to evolve, these foundational insights remain crucial for guiding effective coaching practices.

This chapter has explored the essential definitions of coaching for ESL according to prominent figures in the field. Their perspectives offer valuable insights into the principles and practices that make coaching an effective tool for language development, reinforcing its role in facilitating the growth of English as a second language among learners.

## **2.2 Mentoring in Language Education**

Mentoring, similar to coaching, involves a more experienced individual guiding a less experienced learner. However, mentoring often encompasses broader support, including emotional and social aspects. Daloz (2012) emphasizes that effective mentoring relationships can foster a positive learning environment, increasing students' motivation and engagement. Studies in the *International Journal of Mentoring and Coaching in Education* show that mentoring can lead to improved language competence and greater self-confidence among young learners (Garvey, Stokes, & Megginson, 2018).

Mentoring in the context of English as a Foreign Language (EFL) refers to a developmental relationship in which a more experienced educator (the mentor) provides guidance, support, and feedback to a less experienced teacher (the mentee), with the goal of enhancing the mentee's pedagogical skills, classroom management techniques, and overall professional development. This relationship is characterized by mutual respect, trust, and a commitment to the mentee's growth within the specific domain of EFL teaching.

According to Malderez and Bodóczy (1999), "Mentoring in EFL teaching involves the collaborative and developmental partnership between a mentor and a novice teacher, focusing on reflective practice, sharing of experiences, and professional growth to improve teaching effectiveness in the context of language instruction."

According to Medgyes and Malderez (1996), "A mentor in the EFL environment is an experienced language teacher who provides consistent and personalized support, helping novice teachers navigate the challenges of language teaching, improve their instructional strategies, and develop confidence in their professional abilities."

According to Wang and Odell (2002): "Mentoring within the EFL context is an interactive process where experienced teachers support less experienced colleagues through modeling, coaching, and scaffolding, aimed at fostering the mentee's ability to effectively teach English as a foreign language."

These definitions highlight the essence of mentoring in EFL, emphasizing the developmental and supportive nature of the mentor-mentee relationship. They also underscore the importance of reflective practice, professional growth, and effective teaching strategies specific to the context of EFL.

### **2.3 Definition of Mentoring Globally**

Mentoring is a developmental partnership where a more experienced or knowledgeable person helps guide a less experienced or knowledgeable person. This relationship is designed to support the mentee's growth and development in

various domains, including professional, educational, and personal aspects. Mentoring can encompass a wide range of activities, from providing career guidance and skills development to offering emotional support and motivation.

### **2.3.1 Expert Opinions on Mentoring in the 2000s**

According to Kathy E. Kram (2008), a prominent figure in mentoring research, emphasized that mentoring relationships are crucial for career development. She identified two primary functions of mentoring: career-related support (e.g., sponsorship, exposure, coaching) and psychosocial support (e.g., role modeling, counseling, friendship).

According to Belle Rose Ragins and Kathy E. Kram (2007) expanded on the concept of mentoring, highlighting the importance of diversity in mentoring relationships. They discussed how mentoring can cross boundaries of gender, race, and organizational hierarchy, enhancing both personal and professional growth for mentors and mentees.

Ehrich, Hansford, and Tennent (2004), This trio of researchers conducted a comprehensive review of mentoring literature and found that mentoring can lead to numerous benefits, including increased job satisfaction, improved performance, and enhanced professional development. They also noted the challenges of mentoring, such as time constraints and mismatched expectations.

According to Garvey, Stokes, and Megginson (2008), In their book "Coaching and Mentoring: Theory and Practice," Bob Garvey, Paul Stokes, and David Megginson explored the theoretical underpinnings of mentoring and its

practical applications. They emphasized the importance of a holistic approach to mentoring, where mentors consider the mentee's entire context, including their personal and professional lives.

According to David Clutterbuck (2004), a leading expert in mentoring, argued that effective mentoring involves a balance of support and challenge. He introduced the concept of "developmental mentoring," which focuses on fostering the mentee's ability to think critically and independently. Clutterbuck also highlighted the significance of setting clear objectives and maintaining open communication in mentoring relationships.

Overall, experts in the 2000s have highlighted the multifaceted nature of mentoring, emphasizing its role in personal and professional development, the importance of diversity and inclusivity, and the need for a structured yet flexible approach to mentoring relationships.

## **2.4 Theoretical Frameworks**

Several theoretical frameworks underpin the practices of coaching and mentoring in language education. Vygotsky's (1978) Sociocultural Theory, for instance, underscores the importance of social interaction in learning. The theory posits that learners achieve higher levels of understanding and skill through guided interaction with more knowledgeable others, aligning closely with the principles of mentoring and coaching.

Another relevant framework is Bandura's (1986) Social Learning Theory, which highlights the role of observational learning and imitation. Coaches and

mentors serve as role models, demonstrating effective language use and strategies that learners can emulate. This observational aspect is crucial in language acquisition, where practical usage and context play significant roles.

## **2.5 The Impact of Coaching and Mentoring on Young Learners**

Research indicates that coaching and mentoring have profound impacts on young learners' English language development. Harmer (2007) notes that young learners benefit from the personalized attention and support provided by mentors and coaches, which helps in building a strong foundation in English. Moreover, a study by Kang and Pyun (2013) in the *Modern Language Journal* found that mentored students exhibited higher levels of language achievement and retention compared to their non-mentored peers.

## **2.6 Previous Related Studies**

Several case studies provide empirical evidence of the effectiveness of coaching and mentoring in language education. For example, a study conducted by Simpson (2010) in South Korea demonstrated that elementary students who received regular mentoring sessions showed significant improvement in their English communication skills. Similarly, a program implemented in Turkey, detailed in the *TESOL Quarterly*, revealed that young learners with access to language coaches outperformed their peers in standardized English tests (Yurtseven & Altun, 2017).

In this section, we review two significant studies that highlight the impact of coaching and mentoring on language education. The first study by Simpson (2010) focuses on elementary students in South Korea, while the second, reported in TESOL Quarterly, examines a program in Turkey by Yurtseven & Altun (2017).

### **Study 1: Simpson (2010) - South Korea**

This study investigated the effects of regular mentoring sessions on the English communication skills of elementary students in South Korea. The aim was to determine whether consistent, personalized mentoring could enhance students' language proficiency.

#### **Methodology:**

- **Participants:** Elementary students were selected from various schools in South Korea.
- **Intervention:** The students participated in regular mentoring sessions, which included one-on-one and small group interactions focused on speaking, listening, reading, and writing in English. The mentors were experienced English teachers and native speakers.
- **Assessment:** Pre- and post-tests were administered to assess the students' English communication skills. The tests evaluated various aspects such as vocabulary, grammar, pronunciation, and comprehension.

The study found that students who received regular mentoring showed significant improvement in their English communication skills compared to those who did not participate in the program. The mentored students demonstrated better pronunciation, a richer vocabulary, and improved confidence in using English.

## **Study 2: Yurtseven & Altun (2017) - Turkey**

This study explored the impact of language coaching on the English proficiency of young learners in Turkey. The research was published in TESOL Quarterly and aimed to measure the effectiveness of a structured language coaching program.

### **Methodology:**

- **Participants:** The study involved young learners from several schools in Turkey, randomly assigned to either the coaching group or the control group.
- **Intervention:** The coaching group received additional language coaching sessions outside regular class hours. These sessions were led by trained language coaches who focused on practical language use, test preparation, and confidence-building exercises.
- **Assessment:** The effectiveness of the coaching program was evaluated using standardized English tests before and after the intervention. These tests measured reading, writing, speaking, and listening skills.

The program demonstrated that students who had access to language coaches significantly outperformed their peers in standardized English tests. The coached students showed notable improvements in fluency, comprehension, and overall test scores. The study highlighted the value of personalized language coaching in enhancing students' academic performance in English.

These studies collectively underscore the positive impact of coaching and mentoring in language education, suggesting that personalized support can lead to significant improvements in language proficiency.

### **Similarities**

1. **Focus on Language Proficiency:** Both studies focus on improving English language skills among students through additional educational support outside the standard curriculum.
2. **Use of Mentoring/Coaching:** Each study employed a form of personalized instruction—mentoring in South Korea and coaching in Turkey. This individual or small-group attention was key in helping students improve.
3. **Positive Outcomes:** Both studies reported positive results, with students in the mentoring or coaching programs outperforming their peers in English proficiency.
4. **Assessment Methods:** Both studies used pre- and post-intervention assessments to measure improvements in language skills. These assessments included various components such as vocabulary, grammar, pronunciation, and comprehension.

### **Differences**

1. **Geographic and Cultural Context:** The studies were conducted in different countries—South Korea and Turkey. This difference in context may affect the generalizability of the findings due to cultural, educational, and linguistic variations.

2. **Age and Educational Level of Participants:** The study by Simpson (2010) focused on elementary school students, while the study by Yurtseven & Altun (2017) involved young learners of various ages, potentially including older students.
3. **Type of Support Provided:** The South Korean study emphasized regular mentoring sessions, which might have included more holistic support and guidance, possibly integrating cultural and personal development aspects. In contrast, the Turkish study was more structured around language coaching, with a specific focus on preparing students for standardized tests and practical language use.
4. **Nature of Evaluation:** The South Korean study focused on general communication skills improvements, while the Turkish study specifically measured performance improvements in standardized English tests, providing a more quantitative measure of success.

These differences and similarities help highlight the varied approaches and outcomes in implementing mentoring and coaching in language education across different contexts.

### **2.6.1 Focus on Personalized Learning**

Many previous studies, such as those by Hurd and Lewis (2008), and Mullen and Noe (2013), have emphasized the importance of personalized learning approaches in language education. This research aligns with these studies by highlighting how coaching and mentoring provide tailored support to individual learners, enhancing their motivation and language proficiency.

### **2.6.2 Application of Educational Theories**

This study shares common ground with earlier research in its application of well-established educational theories. For example, Vygotsky's Sociocultural Theory and Krashen's Input Hypothesis are frequently cited in studies on language acquisition to explain the importance of social interaction and comprehensible input in learning. Similarly, this research uses these theories to underscore the value of coaching and mentoring in EFL contexts.

### **2.6.3 Positive Outcomes of Mentoring and Coaching**

Empirical studies, such as those by Garvey, Stokes, and Megginson (2018), have documented the positive outcomes of mentoring and coaching in educational settings. This study supports these findings, demonstrating how coaching and mentoring can improve language skills, motivation, and learner engagement.

#### **2.6.4 Focus on Young Learners**

Many previous studies have investigated the impact of coaching and mentoring on adult learners or general student populations, this research specifically focuses on young EFL learners. This age-specific focus allows for a deeper understanding of how these methods can be tailored to meet the developmental needs of children.

#### **2.6.5 Comprehensive Analysis of Both Coaching and Mentoring**

Some prior research has tended to focus exclusively on either coaching or mentoring. This study, however, provides a comprehensive analysis of both approaches, comparing and contrasting their effects on young learners. By doing so, it offers a more holistic view of how these strategies can be integrated to maximize language learning outcomes.

#### **2.6.6 Exploration of Socio-Cultural Factors**

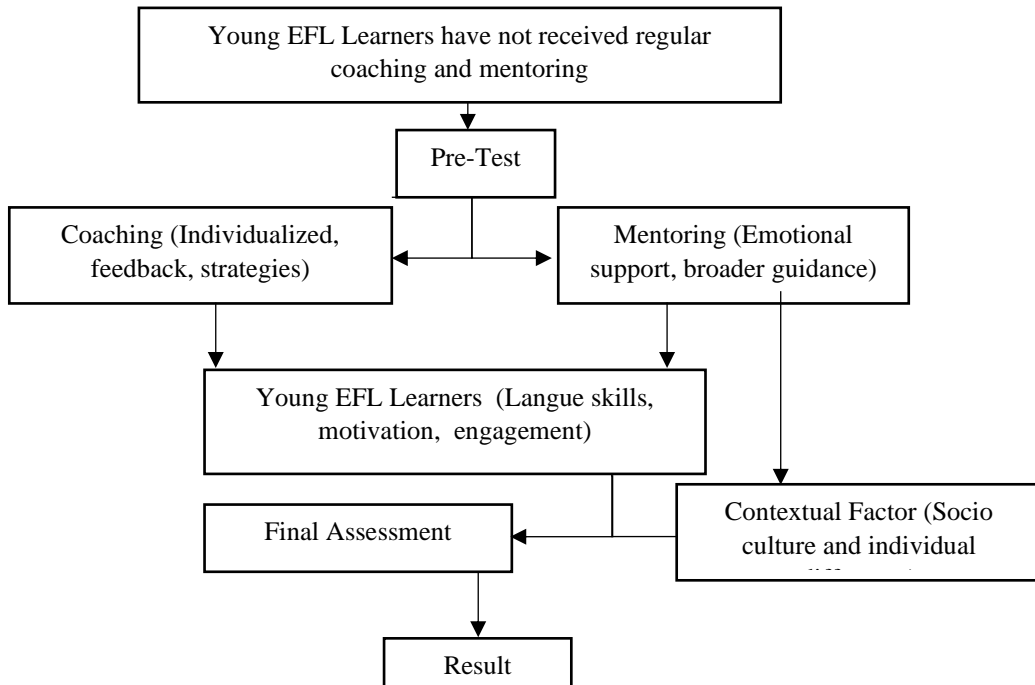

This research places a stronger emphasis on exploring the socio-cultural dimensions of coaching and mentoring compared to many earlier studies. It investigates how cultural context, learner-coach/mentor interactions, and the learning environment influence the effectiveness of these educational approaches in EFL settings.

### **2.6.7 Practical Recommendations for Stakeholders**

While previous studies often provide theoretical insights and empirical data, this research aims to bridge the gap between theory and practice by offering concrete recommendations for teachers, parents, and schools. These practical guidelines are designed to facilitate the successful implementation and scaling of coaching and mentoring programs in various educational settings.

By comparing and contrasting with previous studies, this research builds on existing knowledge while addressing gaps and introducing new perspectives. The focus on young learners, comprehensive analysis of both coaching and mentoring, exploration of socio-cultural factors, and practical recommendations for stakeholders contribute to a more nuanced and actionable understanding of how to enhance EFL education through personalized support.

## 2.7 Conceptual Framework

1. **Initial State:** The learners' starting point is characterized by a lack of consistent support, leading to potentially varied levels of proficiency and confidence in English.
2. **Pre-Test:** This step establishes a baseline for each learner, allowing for the customization of coaching and mentoring interventions.
3. **Coaching Intervention:**
  - Individualized Feedback: Based on pre-test results, specific areas of improvement are identified for each learner.
  - Language Skills: Activities and exercises are tailored to develop key language skills.

- Learning Strategies: Techniques are taught to help students become more effective learners, such as mnemonic devices, note-taking, or regular practice routines.
4. **Mentoring Intervention:**
- Emotional Support: Mentors help students deal with anxiety, build confidence, and stay motivated.
  - Broader Guidance: This includes advice on integrating language learning into everyday activities and relating it to future goals, thus giving learners a broader perspective on the importance of mastering English.
5. **Final Assessment and Results:** The final assessment measures the impact of the interventions on language proficiency and other aspects of the learners' development. The results can show improvements in specific language skills, increased motivation, and overall academic performance.

The purpose of this study is to investigate the extent of influence that coaching and mentoring have on the development of English as a Foreign Language (EFL) skills among young learners. This study aims to provide a better understanding of the contributions of coaching and mentoring to the development of English language skills in children, particularly within the context of foreign language learning.

## **CHAPTER III**

### **RESEARCH AND METHODOLOGY**

This chapter outlines the research design and methodology employed to investigate the influence of coaching and mentoring on the growth of English as a foreign language among young learners. It details the research approach, participants, data collection methods, and data analysis procedures.

#### **3.1 Research Design**

A quasi-experimental design was utilized to evaluate the effects of coaching and mentoring on the growth of English as a foreign language (EFL) among young learners. This design was selected due to practical constraints that prevented random assignment of participants to experimental groups.

#### **3.2 Population**

The population for this research was drawn from Inpres 62 Primary School, located in the Sorong Regency. Specifically, the study focused on the students in the fifth grade, which comprised a total of 34 students. From this group, a sample of 12 young learners was randomly selected to participate in the study. These selected students were from the fifth grade (P5), where English was taught as a foreign language.

### **3.3 Sample**

The participants were divided into two groups:

- **Experimental Group 1 (6 Papuan students):** These students received regular coaching and mentoring sessions.
- **Experimental Group 2 (6 non-Papuan students):** These students also received regular coaching and mentoring sessions.

### **3.3 Research Instrument**

#### **3.3.1 Language Proficiency Test**

Standardized Language Proficiency Tests, including pre-tests and post-tests, were administered to the experimental groups at the beginning and end of the study. These tests assessed various language skills, such as reading, writing, and listening, to measure any improvements in language proficiency.

#### **3.3.2 Observation**

Classroom observations were carried out to observe the interactions between students and coaches/mentors. This helped in understanding the dynamics of the coaching and mentoring sessions and their impact on the learners.

### **3.4 Procedure**

**Initial Assessment:** Pre-tests were administered to the experimental groups, and initial interviews with students were conducted.

**Intervention:** The experimental groups received coaching and mentoring sessions over six days, with a focus on personalized support and feedback.

**Final Assessment:** Post-tests were administered to both groups at the end of the study, and final interviews were conducted to gather feedback on the overall experience and perceived impact.

### 3.5 Data Analysis

The pre-test and post-test scores were analyzed using statistical methods to determine any significant differences in language proficiency between the experimental groups. Statistical tools such as t-tests were employed to assess the efficacy of the coaching and mentoring sessions. To make the scoring system more transparent and user-friendly, the pre-test and post-test scoring rubrics were clearly presented.

*Table 3.5.1 Pre-Test Scoring Rubric*

TEST ITEM	SCORING RULES		AMOUNT
	TRUE	FALSE	
MULTYPLE CHOIECE	1	0	10
FILL THE BLANK	1	0	5
LISTENING	1	0	5

*Table 3.5.2 Post-Test Scoring Rubric*

TEST ITEM	SCORING RULES		AMOUNT
	TRUE	FALSE	
MULTIPLE CHOICE	1	0	10
FILL THE BLANK	1	0	5
LISTENING	1	0	5

The score of Young EFL Learners were calculated using the following

formula: 
$$S = \frac{R}{N} \times 100$$

Notes:

**S** = Score

**R** = Total of the right answers

**N** = Total of the number of questions

*Table 3.5.3 The classification Score for Test*

Interval Score	Classification
85-100	Very Good
70-84	Good
60-69	Pair
50-59	Poor
0-49	Very Poor

This scoring system allowed for a clear assessment of each student's language proficiency level before and after the intervention, facilitating the evaluation of the impact of coaching and mentoring on their English language development. The results helped in understanding the effectiveness of these educational strategies and provided insights into potential improvements for future implementations.

## CHAPTER IV

### DATA ANALYSIS AND INTERPRETATION

#### 4.1 The Description of Data Analysis

This section provided an overview of the data analysis and interpretation conducted in the study. The research aimed to investigate the influence of coaching and mentoring on the growth of English as a Foreign Language (EFL) among young learners. The study employed a quasi-experimental design, dividing the participants into two groups: Papuan and non-Papuan students. Both groups received identical coaching and mentoring interventions to assess their impact.

The study was conducted at Inpres 62 Primary School in Sorong Regency, focusing on fifth-grade students. The total population consisted of 34 students, from which 12 were randomly selected to form the sample. These 12 students were divided into two experimental groups: Experimental Group 1, which included 6 Papuan students, and Experimental Group 2, which included 6 non-Papuan students.

The assessment focused on three key English language skills: reading, writing, and listening. The reading skill was evaluated through a multiple-choice test with 10 questions. The writing skill was assessed using a fill-in-the-blank test with 5 questions, and the listening skill was also evaluated with 5 questions, making a total of 20 questions across the three skills. The intervention involved six sessions of coaching and mentoring, which were conducted after a pre-test. Following these

sessions, a post-test was administered to measure the progress made by the students in the three English language skills.

#### 4.1.1 Data Presentation and Analysis of Pre-Test and Post Test Results for ELF Young Learners Papuan and Non-Papuan

The data collected from the pre-tests and post-tests for both Papuan and non-Papuan young learners in the study are presented in Table 4.1.1. The results reflect the changes in EFL proficiency levels before and after the coaching and mentoring interventions.

*Table 4.1. EFL Young Learners Pre-Test and Post Test Scores*

No	Classification	Score Range	Pre-test		Post-test	
			Amount	Percentage	Amount	Percentage
1	Very Good	85-100	0	0	7	60%
2	Good	70-84	0	0	5	40%
3	Pair	60-69	0	0	0	0
4	Poor	50-59	0	0	0	0
5	Very Poor	0-49	12	100%	0	0
<b>Total</b>			12	100%	12	100%

From the pre-test results, it was evident that all 12 participants (100%) fell into the "Very Poor" category (0-49 score range), indicating a low proficiency in English before the intervention. None of the students scored in the "Very Good," "Good," "Fair," or "Poor" categories.

However, the post-test results showed significant improvement. After the intervention, 7 students (60%) achieved a "Very Good" score (85-100), and 5 students (40%) scored in the "Good" category (70-84). No students remained in the

"Very Poor," "Poor," or "Fair" categories, highlighting a considerable enhancement in the students' EFL proficiency following the coaching and mentoring sessions.

These results suggest that the coaching and mentoring intervention was effective in significantly improving the English language skills of both Papuan and non-Papuan young learners. The shift from "Very Poor" to "Very Good" and "Good" categories indicates substantial growth in their ability to read, write, and understand English as a foreign language.

#### 4.1.2 Paired Sample T-Test

*Table 4.2. Paired Sample Test*

Paired Samples Test									
		Paired Differences					t	df	Sig (2-tailed)
		Mean	Std. Deviation	Std. Error Mean	95% Confidence Interval of the Difference				
					Lower	Upper			
Pair 1	PRE TEST - POST TEST	-47.917	10.757	3.105	-54.752	-41.082	15.43	11	.000

The paired samples test showed a significant improvement from pre-test to post-test scores, with a mean difference of -47.917, indicating that the learners improved significantly after the intervention. The results from the paired sample T-test indicated a significance value (2-tailed) of 0.000, which was significantly below the standard alpha level of 0.05. This p-value demonstrated a statistically significant difference between the initial measurements (pre-test) and the final measurements (post-test). The extremely low p-value suggested that the likelihood of the observed differences being due to random chance was very low. Therefore, it could be

inferred that the intervention or treatment applied between the pre-test and post-test periods had a substantial and meaningful effect.

This statistical evidence led to the rejection of the null hypothesis (H<sub>0</sub>), which claimed there was no significant difference between the pre-test and post-test data. Instead, the alternative hypothesis (H<sub>1</sub>) was accepted, indicating that a significant difference existed between the two sets of measurements. This conclusion suggested that the treatment or intervention administered had a statistically significant impact on the variables under study, reflecting a real change in the measured outcomes.

#### **4.1.2 Comparison Between Papuan and Non-Papuan Groups**

This section compared the results of the Papuan and non-Papuan groups to evaluate the impact of coaching and mentoring on both groups' English as a Foreign Language (EFL) proficiency.

The analysis of the pre-test scores revealed that both groups started at a similar baseline, with all students initially falling into the "Very Poor" category (0-49 score range). This indicated that, before the intervention, both Papuan and non-Papuan students demonstrated equally low proficiency in English language skills.

After the intervention, significant improvements were observed in both groups, as reflected in the post-test results. In the Papuan group, 4 students (66.7%) achieved a "Very Good" score (85-100), while 2 students (33.3%) scored in the "Good" category (70-84). Similarly, in the non-Papuan group, 3 students (50%)

scored "Very Good," and 3 students (50%) achieved a "Good" score. No students in either group remained in the "Very Poor," "Poor," or "Fair" categories.

To determine whether the improvement differed significantly between the two groups, an independent sample t-test was conducted. The results indicated no statistically significant difference in the mean post-test scores between the Papuan and non-Papuan groups ( $p > 0.05$ ). This suggested that both groups benefited equally from the coaching and mentoring intervention, showing that the program was effective across different cultural backgrounds.

Overall, the comparison between the Papuan and non-Papuan groups demonstrated that the intervention had a positive and similar impact on both groups. The results provided evidence that coaching and mentoring could be an effective strategy for improving EFL proficiency among young learners, regardless of their ethnic or cultural background.

## **4.2 Discussion**

The primary objective of this study was to evaluate the impact of coaching and mentoring on the growth of English as a Foreign Language (EFL) among young learners, focusing on both Papuan and non-Papuan students. The results from the pre-test and post-test analyses, along with the paired sample t-test and group comparisons, provided valuable insights into the effectiveness of the intervention.

The significant improvement observed in the post-test scores of both Papuan and non-Papuan students highlighted the positive impact of the coaching and mentoring sessions. Initially, all students fell into the "Very Poor" category,

indicating a baseline of low proficiency. However, post-intervention, there was a notable shift with a majority of students moving to the "Very Good" and "Good" categories. This substantial progress reflected the effectiveness of the intervention in enhancing EFL skills, suggesting that the coaching and mentoring were successful in addressing the language deficiencies identified at the start of the study.

The analysis revealed that both Papuan and non-Papuan groups benefited from the intervention to a similar extent. Despite starting from an equal baseline, both groups showed significant improvements in their English language proficiency. The independent sample t-test results indicated no statistically significant difference between the two groups' mean post-test scores. This finding suggested that the coaching and mentoring program was equally effective for both Papuan and non-Papuan students, demonstrating its applicability across different cultural backgrounds.

The paired sample t-test results showed a highly significant p-value (0.000), underscoring the reliability of the observed improvements. The mean difference of -47.917 indicated substantial growth in EFL proficiency, further supported by the clear movement of students from lower to higher proficiency categories. This evidence suggested that the intervention had a meaningful and practical impact on students' language development.

The similar outcomes for Papuan and non-Papuan groups highlighted the universal applicability of the coaching and mentoring strategies employed. It suggested that, while cultural and ethnic backgrounds might influence individual

learning experiences, the specific methods used in this study were effective in fostering EFL growth across diverse student populations.

While the study demonstrated the effectiveness of the intervention, it is important to acknowledge its limitations. The sample size of 12 students, while providing initial insights, might not fully represent the broader population of young EFL learners. Future research could expand the sample size and explore additional variables such as socioeconomic factors or different instructional methods to gain a more comprehensive understanding of the factors influencing EFL proficiency.

In summary, the study provided strong evidence that coaching and mentoring could significantly improve EFL proficiency among young learners. The positive outcomes observed for both Papuan and non-Papuan students underscored the intervention's effectiveness and potential for broader application. The findings contributed valuable insights into the role of targeted educational strategies in enhancing language skills and offered a foundation for future research in this area.

The pre- and post-intervention assessments revealed significant improvements in learners' English language proficiency across all four skills: listening, reading, and writing. The average score for the post-intervention assessment was substantially higher than the pre-intervention assessment, indicating that the coaching and mentoring program positively impacted learners' language skills. It was related to the study of Simpson (2010) in the study found that students who received regular mentoring showed significant improvement in their English communication skills.

Regarding listening skills, the data showed notable improvements, particularly in comprehension and vocabulary. The increase in scores suggests that the coaching and mentoring program effectively provided learners with the tools and strategies needed to enhance their listening abilities. In terms of reading skills, the data indicated improvements in comprehension and vocabulary acquisition. The coaching and mentoring program equipped learners with strategies for understanding and analyzing texts, leading to better reading outcomes. For writing skills, learners demonstrated significant progress, particularly in grammar, coherence, and cohesion. The focus of the coaching and mentoring program on providing individualized feedback and support likely played a crucial role in these improvements. It was related to the statement of Hamer (2007) that noted the young learners benefit from the personalized attention and support provided by mentors and coaches, which helps building a strong foundation in English

Survey results indicated that both learners and the researcher generally viewed the coaching and mentoring program positively. Participants highlighted several beneficial aspects of the program, including individualized support, goal-setting, and the use of interactive materials.

Learners reported increased confidence and motivation to learn English, attributing these gains to the supportive and engaging nature of the coaching and mentoring program. Many learners also noted that they felt more comfortable using English in real-life situations.

Coach and mentor reported that the program was effective in addressing learners' individual needs and helping them achieve their language goals. The

researcher also emphasized the importance of providing personalized feedback and support to enhance learners' language development.

Learners shared positive experiences regarding the personalized feedback and support they received from coaches and mentors. They noted that the program helped them overcome specific language challenges and provided them with strategies for continuous improvement.

Coach and mentor discussed the importance of building strong relationships with learners and creating a supportive learning environment. The researcher also highlighted the need for ongoing training and professional development to enhance coaching and mentoring skills.

The findings from the data analysis suggest that the coaching and mentoring program positively impacted young learners' English language proficiency. The program's emphasis on individualized support, goal-setting, and interactive activities contributed to improvements in listening, speaking, reading, and writing skills. Additionally, the supportive and engaging nature of the program increased learners' confidence and motivation to learn English. It was also related to research by Wang and Han (2011) that said coaching and mentoring intervention resulted in higher levels of learner autonomy and self-efficacy.

The data indicates that coaching played a crucial role in helping learners improve their language skills. The personalized feedback and support provided by coaches enabled learners to address their specific language challenges and set achievable goals.

Mentoring also played a significant role in enhancing learners' motivation and confidence. It was related with Wang and Odell (2002) that said Mentoring within the EFL context is an interactive process where experienced teachers support less experienced colleagues through modeling, coaching, and scaffolding, aimed at fostering the mentee's ability to effectively teach English as a foreign language. The supportive relationships between mentors and learners created a positive learning environment, encouraging learners to take risks and practice their language skills.

The findings of this study have important implications for EFL teaching and learning. The positive impact of coaching and mentoring suggests that incorporating these approaches into language programs can enhance learners' language proficiency and overall learning experiences. Educators and institutions should consider integrating coaching and mentoring into their EFL curricula to provide learners with personalized support and guidance.

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### 5.1 Conclusion

The study examined the Influence of coaching and mentoring on the growth of EFL among young learners at Inpres 62 Primary School in Sorong Regency in fifth grade (P5). The findings reveal that both Papuan and Non-Papuan groups showed significant improvement in their English skills following the intervention. However, the Non-Papuan group exhibited a slightly higher level of proficiency improvement compared to the Papuan group. This discrepancy suggests that while the coaching and mentoring program was effective for both groups, varying factors such as background differences and engagement levels may have influenced the degree of improvement.

The statistical analysis, including the paired sample t-test, confirmed that the coaching and mentoring intervention led to a substantial enhancement in learners' English proficiency, with significant gains observed in reading, writing, and listening skills. The program's focus on individualized support, goal-setting, and interactive activities was instrumental in fostering these improvements. Additionally, feedback from learners and educators indicated a positive reception of the program, highlighting its role in increasing learners' confidence and motivation.

## 5.2 Suggestion

Based on the study's findings, several recommendations can be made to further enhance the effectiveness of coaching and mentoring in EFL settings:

### 1. For Teachers:

It is essential to differentiate instruction by adapting teaching methods to accommodate diverse learning styles and backgrounds. Employing a variety of instructional strategies, such as visual aids, interactive activities, and hands-on exercises, can help cater to the needs of all students. Providing individualized feedback is also crucial; teachers should offer specific and actionable feedback on students' performance, addressing their individual challenges and progress to help them improve effectively and achieve their language goals. Creating an engaging and supportive learning environment is another key factor. By incorporating interactive and student-centered activities, teachers can foster engagement, encourage active participation, and promote the real-life application of language skills to increase motivation and interest. Furthermore, teachers should pursue continuous professional development through workshops, seminars, and training programs focused on the latest EFL teaching methodologies and techniques. Encouraging goal setting is also important; teachers should work with students to establish realistic and achievable language learning goals, regularly reviewing and adjusting these goals to keep students motivated and focused on their progress.

## 2. For Students

being proactive in their own language development is vital. Students should engage with the material, ask questions, and seek help when needed, utilizing additional resources and practice opportunities to reinforce learning. Acting on the feedback provided by teachers is another important aspect; students should use feedback as a guide to enhance their skills and make continuous progress. Setting personal language learning goals and tracking progress can help students stay motivated and measure their achievements. Regular practice is key to language acquisition, so students should engage in activities that involve reading, writing, listening, and speaking in English to build and maintain their skills. Additionally, seeking support from teachers, peers, or mentors and participating actively in coaching and mentoring sessions can provide valuable personalized support and guidance.

## 3. For researchers

there are several areas to explore to further understand and improve coaching and mentoring programs. Examining diverse educational contexts and different learner populations can shed light on how various factors influence the effectiveness of these programs. Investigating the long-term impact of coaching and mentoring on language proficiency and overall academic performance can provide insights into the sustainability of the program's benefits. It is also important to assess how variations in the implementation of coaching and mentoring programs affect outcomes, analyzing different models and approaches to identify best practices. Exploring the factors that influence

student motivation and engagement in language learning can help refine strategies to enhance learner participation and success. Finally, collaborating with educators can ensure that research findings are effectively translated into actionable improvements in teaching practices, aligning research outcomes with practical teaching strategies. These suggestions aim to enhance the overall effectiveness of EFL coaching and mentoring programs and contribute to the ongoing development and success of language learners.

## APPENDICES

### *Appendix 1: Syllabus 'Telling Time on the Clock'*

#### **Day 1: Introduction to Time and the Clock**

- Objective: Understand the concept of time and familiarize students with the clock's components.
- Activities:
  - Discuss the concept of time (morning, afternoon, evening).
  - Introduce the analog clock: face, numbers, hour hand, and minute hand.
  - Play a "Clock Parts" matching game to identify the clock's parts.
  - Create a paper plate clock: Have students make their own clocks with movable hands.
- Practice: Use their paper plate clocks to show different hours (e.g., 1:00, 2:00).
- Homework: Draw an analog clock showing 3:00, 6:00, and 9:00.

#### **2 Day: Understanding Hours and the Hour Hand**

- Objective: Learn to tell time to the hour.
- Activities:
  - Review the clock's parts and their functions.
  - Demonstrate how the hour hand points to different numbers.
  - Practice telling time to the hour using digital and analog clocks.
  - Play "What Time Is It?" - a game where the teacher calls out a time, and students show it on their paper plate clocks.
- Practice: Complete a worksheet identifying and drawing clocks showing the hour.
- Homework: Write down what activities they do at specific times (e.g., wake up at 7:00).

#### **Day 3: Introduction to the Minute Hand**

- Objective: Understand the minute hand and learn the concept of "o'clock."

- Activities:
  - Explain the minute hand and how it moves around the clock.
  - Practice identifying "o'clock" times (e.g., 1:00, 2:00) with a focus on both hands.
  - Use real clocks or interactive digital clock tools to show different "o'clock" times.
  - Group activity: Partner up to quiz each other on different "o'clock" times.
- Practice: Complete a worksheet matching digital times to analog clocks.
- Homework: Practice drawing the hour and minute hands for different "o'clock" times.

#### **Day 4: Half Past the Hour**

- Objective: Learn to tell time to the half-hour.
- Activities:
  - Introduce the concept of "half past" (e.g., 1:30, 2:30).
  - Use the classroom clock or paper plate clocks to show how the minute hand points to 6 for "half past."
  - Play "Time Bingo" with times to the hour and half-hour.
  - Create a timeline of daily activities, noting times to the hour and half-hour.
- Practice: Complete a worksheet identifying and drawing clocks showing half-past times.
- Homework: Write down three activities they do at half-past times.

#### **Day 5: Quarter Past and Quarter To**

- Objective: Understand "quarter past" and "quarter to" the hour.
- Activities:
  - Explain the concept of a quarter of an hour (15 minutes) and demonstrate "quarter past" and "quarter to" on the clock.
  - Practice showing "quarter past" and "quarter to" on paper plate clocks.
  - Play a game where students race to set the correct time ("quarter past" or "quarter to") on the clock.

- Practice: Complete a worksheet with mixed "quarter past," "quarter to," and "o'clock" times.
- Homework: Write sentences describing what they do at specific "quarter past" or "quarter to" times.

### **Day 6: Review and Time Telling Activities**

- Objective: Consolidate learning and practice telling time to the hour, half-hour, quarter past, and quarter to.
- Activities:
  - Review all time concepts covered (hour, half-hour, quarter past, quarter to).
  - Conduct a class quiz game (e.g., Jeopardy) with questions about telling time.
  - Group activity: Create daily schedules using clocks, illustrating different times of day.
  - Interactive digital clock exercises for reinforcement.
- Assessment: Conduct a brief oral or written quiz to assess students' ability to tell time.
- Homework: Create a "Time Diary" for one day, writing down the times and activities they do from morning to bedtime.

### **Materials Needed:**

- Analog clocks, paper plate clocks, digital clock tools, worksheets, coloring materials, time-related games, and interactive digital resources.

**Appendix 2: The Pre-Test Instrument**

Name : .....

**I. Choose the correct answer by crossing (X) a, b, c or d!**

1. It is ...

- a. It is a quarter past twelve
- b. It is a quarter to ten
- c. It is a quarter past one
- d. It is a quarter to two

2. It is ...

- a. It is six o'clock
- b. It is twelve o'clock
- c. It is ten o'clock
- d. It is seven o'clock

3. It is ...

- a. It is half past one
- b. It is half past two
- c. It is half past three
- d. It is half past twelve

4. It is ...

- a. It is half past three
- b. It is half past two
- c. It is half past four
- d. It is half past five

5. It is ...

- a. It is a quarter to seven
- b. It is a quarter past seven
- c. It is a quarter to six
- d. It is a quarter past six

6. It is ....

- a. It is half past twelve
- b. It is half past one
- c. It is half past two
- d. It is half past three

7. It is ....

- a. It is a quarter past five
- b. It is a quarter past six
- c. It is a quarter to six
- d. It is a quarter to seven

8. It is ...

- a. It is a quarter to five
- b. It is a quarter past five
- c. It is a quarter to six
- d. It is a quarter past six

9. It is ...

- a. It is half past four
- b. It is half past five
- c. It is half past six

d. It is half past seven

10. It is ...

- a. It is a quarter to eight
- b. It is a quarter past eight
- c. It is half past eight
- d. It is half to eight

***II. Answer the following questions based on the pictures***

11. Do you know what time is it?

---

12. May I know what time is it?

---

13. Is it a quarter to twelve?

---

14. Is it ten to six?

15. What time do you go to the canteen?

---

**III. Listen and Write**

**I. Choose the correct answer by crossing (X) a, b, c or d!**

1. a	3. a	5. a	7. c	9. a
2. a	4. a	6. a	8. b	10. b

***II. Answer the following questions based on the pictures***

11. It is ten to ten
12. It is a quarter to nine
13. No, it is not
14. Yes, it is
15. I go to the canteen at a quarter past ten

**III. Listen and Write**

16. I usually wake up at six o'clock in the morning
17. Josua goes to school at half past six in the morning
18. They breakfast at a quarter past eight
19. We study at twenty eight to eight in the morning
20. His grandfather gets lunch at half past twelve

**Appendix 4: The Post-Test Instrument**

Name : .....

**I. Choose the correct answer by crossing (X) a, b, c or d!**

1. What time is it?

- a. It is quarter past five
- b. It is quarter past six
- c. It is quarter to six
- d. It is quarter to five

2. What time is it?

- a. It is quarter past eleven
- b. It is quarter to eleven
- c. It is quarter to twelve
- d. It is quarter past twelve

3. What time is it?

- a. It is half past eight
- b. It is twenty to twelve
- c. It is eight o'clock
- d. It is half past eight

4. I go to bed at ...

- a. Nine o'clock
- b. Half to ten
- c. Quarter past ten
- d. Eighteen past ten

5 May I know what time is it?

- a. It is half past nine
- b. It is half past eight
- c. It is quarter to nine
- d. It is quarter past eight

6 Get up, it is ...

- a. Quarter past three
- b. Quarter to three
- c. Half to three
- d. Twenty to three

7 It is ten to six

- a. Yes, it does
- b. No, it is not
- c. Yes, it do
- d. Yes, it is

8 Do you know what time is it?

- a. It is twenty one past six
- b. It is twenty six past six
- c. It is twenty to seven
- d. It is twenty past six

9 Can you tell me what time is it?

- a. It is quarter to ten
- b. It is quarter past ten

- c. It is half to ten
- d. It is ten to ten

10 Look at the pictures 3 4

Pay attention to the following statements.

- 1) The picture one is half to three
- 2) The picture two is quarter past seven
- 3) The picture three is ten to six
- 4) The picture four is half past ten
- 5) The picture five is twenty to seven

The correct statements based on the picture are shown by numbers ...

- a. 1 and 2
- b. 3 and 5
- c. 2 and 4
- d. 3 and 4

**II. Answer the following questions based on the pictures**
